Professional profile

Software Developer with knowledge in frontend and specialized in blockchain, with experience in technologies such as HTML, CSS, JavaScript, TypeScript, React, and Solidity. I handle architectures like Clean Architecture and Scream Architecture, as well as design patterns in TypeScript. Focused on decentralized solutions and transparency, I have participated in hackathons and developed personal projects in blockchain and Web3.

Technical skills

- **Frontend**: HTML, CSS, JavaScript, React >=18, Next 15.3
- **Blockchain**: Solidity, Truffle, Hardhat, Arweave.
- **Testing**: Postman, Jira, business logic unit testing.
- **Decentralized DNS**: Namebase.io, bob walle(hanshake), arns(arweave).
- **Version control**: Git, GitHub, Notion, Scrum.
- **Good practices**: Scream architecture, atomic deisgn, SOLID, pattern design.

Education

- **Web Development (Self-taught   )**: 2021 - 2024 - **Platzi**
- **Basic Solidity**: Ago 2023 - Oct 2023 – **Ethereum Bogotá (Colombia)**
- **Advanced Solidity**: Nov 2023 - Dic 2023 – **Colledge**
- **Advanced Blockchain**: Ago 2024 - Nov 2024 – **TalentoTech (Bootcamp ministry of technology)**
- **Testing**: Abr 2024 - Jun 2024 – **Mindhub bootcamp**
- **Blockchain developer OnChainbuilderLab:** 2024 - **RedUxTic, EducatETH**
- **English (Level B2)**: Oct 2023 - 2025 currently – **American School Way**

Project Experience

- **Web development (self-taught person)**: 2021 - 2023 - currently - **Platzi**
  Development of frontend projects with React, code management on GitHub, and application of SOLID principles, Atomic Design, and Scream Architecture.
- **Blockchain Explorer (self-taught person)**: Ago 2023 - currently
  Implementation of smart contracts with Solidity, deployment of private and hybrid blockchains with Hyperledger, and configuration of decentralized domains.
- **Hackathon GameAvax innovators - Universidad Sergio Arboleda (2024)**:
  Development of *Ecogems*, a blockchain-based video game built on Avalanche. Achieved third place in the competition. *(August 30 – September 2)*.
- **Blockchain Hackathon con CELO - Universidad Jorge Tadeo Lozano (2023)**:
  Participation in the development of Web3-based solutions and smart contracts using the CELO blockchain. *(December 2–3, 2023)*.
- **Decentralized Domains Handshake, Arweave**: Decentralized domain setup using Handshake via Namebase.io and ArNS on Arweave for permanent web identities.
- **Blockchain Transparency Project**: Research on a personal solution to track public spending in Colombia using blockchain technology.

Additional information

- Skills in **effective communication, problem-solving, teamwork, critical thinking, and adaptability in agile environments.**
